

A photograph showing two men and a donkey on a steep, reddish-brown hillside. One man in a blue and white plaid shirt is in the foreground, leaning on a long pole. Another man in a dark jacket is further back. A donkey with a red container on its back is in the foreground, facing away from the camera. The background shows a valley with green trees and some buildings.

GEO MAROC Sarl

Surveying and geomatics engineering firm – since 2016

Mr. FETOUAKI Abdelfettah

Surveying Engineer – registered with the ONIGT
Court-appointed expert, Beni Mellal Court of Appeal
Director of GEO MAROC Sarl

Cover letter

Dear Sir or Madam,

GEO MAROC Sarl is a surveying and geomatics engineering firm founded in 2016 and based in Beni Mellal, Morocco. It is managed by Mr. FETOUAKI Abdelfettah, a surveying engineer registered with the National Order of Surveying Engineers (ONIGT) and a court-appointed expert at the Beni Mellal Court of Appeal.

We support government bodies, public institutions, engineering consultancies, developers and private clients throughout Morocco: topographic surveys, technical assistance and works monitoring, land and cadastral operations, geomatics and drone photogrammetry.

Our services are delivered by a multidisciplinary team of more than 10 people, deployed according to your needs, with one constant goal: reliable deliverables that comply with current standards and are delivered on time.

In this document you will find our company information sheet and a detailed presentation of our services. We remain at your disposal for any further information or for a quotation tailored to your project.

We look forward to working with you.

Yours faithfully,

FETOUAKI Abdelfettah
Director – GEO MAROC Sarl

Our services

1. Topographic surveys

- **Topographic surveys** at all scales: spot-height plans, site plans, location plans and parcel plans.
- **Setting-out** of engineering structures, buildings, roads and networks.
- **Levelling** and longitudinal and cross-section profiles.
- **Control traverses** tied to the Lambert (Merchich) system.

2. Technical assistance and works monitoring

- On all types of sites: roads and tracks, material quarries, real-estate construction and subdivisions, sanitation works.
- **Boundary marking** of the site footprint and works control.
- **As-built plans** and execution plans.
- **Volume calculations** (earthworks, material stockpiles).

Our services (continued)

3. Land and cadastral operations

- **Land registration** and technical files for subsequent procedures.
- **Subdivision, merging** and splitting of titles for subdivision lots.
- **Title reconciliation** (mise en concordance) of land titles.
- **Co-ownership** technical file and regulations.
- **Plans** boundary, location, parcel and subdivision plans.
- **Support** in choosing land to develop and in procedures with the ANCFCC.

4. Geomatics and drone photogrammetry

- **Aerial drone imagery** and panoramic views.
- **Photogrammetric restitution** restitution plans, orthophotos, DTM and DSM.
- **GIS** application and web geoportal development.
- **Remote sensing** using satellite imagery.

5. Court-appointed real-estate expertise

- Real-estate and topographic expert reports ordered by the courts, as a court-appointed expert at the Beni Mellal Court of Appeal.
